

ProGrip is a co-extruded film with a slightly embossed surface on one side and a tacky surface on the other side. It is an ideal backing material for any application which requires a non-skid surface. It is also ideal for the construction of mouse pads, counter mats, and placemats using American Profol's ProTuff® as the over-laminate film. Printing can be done on either the ProGrip or ProTuff material prior to lamination.

APPLICATIONS:

- Moisture barrier for construction applications
- Mouse pads
- Counter mats and placemats
- Coasters

ADVANTAGES:

- Printable on either the slightly embossed side or tacky side
- Lower cost than rubber or foam rubber backing materials
- Light weight reduces postage costs of promotional items
- Thin material allows for low-profile mouse pad and counter mat construction
- Does not smell or outgas like chemical coatings
- Easy to clean using soap and water - remains tacky after cleaning
- Does not absorb food, beverages, or cleaning chemicals from counters
- Co-extruded construction will not delaminate

MANUFACTURING CAPABILITIES:

- Printable on both slightly embossed side and tacky side
- In-line corona treatment on one or both sides
- Standard colors are white/black (tacky side), black, white, and clear
- Thickness range: 3.5 mil to 12 mil thick
- Standard web width: 44" - 83"
- In-line slitting to custom roll widths
- Biodegradable available
